

If you need **FIRE**,
we deliver you high quality
Finnish wood.

Firewood at its best

Firewoods from Finland™ consists of around thirty firewood producers of central Finland and is governed by Riteman Oy Ltd.

Finnish wood is one of the world's best raw material for use of firewood. Our products are harvested from certified Finnish forests. We deliver birch, pine, spruce and aspen to importers, wholesalers, chains of stores, humanitarian organizations and other large-scale consumers.

Due to well-planned packaging formats we can deliver the goods cost-effectively allowing also easy storing. To maintain high quality, we chamber dry our firewood under highly controlled supervision. Firewood moisture content is only 20% or less which mean that you get very high heat energy out of it.

Firewoods 
from Finland

Products

Birch - The best heat energy (m³):
1010 kWh/thrown in cubes
1700 kWh / stack of cubes
with 20% moisture content.

Pine - The second best heat energy (m³):
810 kWh / thrown in cubes
1360 kWh/ stack of cubes
with 20 % moisture content.

Spruce - High energy product (m³):
790 kWh/ stack of cubes
1320 kWh / stack of cubes
with 20% moisture content.

Aspen - High energy product (m³):
790 kWh/ thrown in cubes
1330 kWh / stack of cubes
with 20% moisture content.

Mixed wood - All of the above products
with random mixture.
